Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 43-47 are rejected under 35 U.S.C. 102(b) as being anticipated by Corcoran (2,788,038). Corcoran discloses all of the elements as shown below in Diagram 2. Corcoran also discloses radially inner edges merge in an angular manner and with a radius with radially outer edges in figure 2 at element 24, and figures 1 and 3; radial ends merge with the radially outer edges in an angular manner and with a radius as shown in figures 1 and 3. Note that the radially outer edges are shorter than the radially inner edges as shown in Diagram ; double trapezoidal tapering shape shown in Diagram 1; the cutting blade is capable of being reversed; the blade sections are disposed in a plane with the main body, wherein the plane is perpendicular to the main body 12, and the plane bisects opening 14.

Diagram 1. Figure 3 of Corcoran labeled with the elements of the limitations of claims 43-47.

3. Claims 38-42 and 49-52 are rejected under 35 U.S.C. 102(b) as being anticipated by Corcoran (2,788,038). Corcoran discloses metal in column 1, line 48; radially outer cutting edges are the edges of elements 22 adjacent to the hidden line in figure 1; radially inner cutting edges are the edges of elements 16 adjacent to the hidden line in figure 1; longitudinal axis is an imaginary line that bisects the lines 20 and 24; the angle between the radially outer cutting edges and the longitudinal axis is large as seen in Diagram 2 below; the angle between the radially inner cutting edges and the longitudinal axis is small as seen in Diagram 3 below; radially inner

cutting edges merge in an angular manner with the radially outer cutting edges as shown in diagrams 2 and 3 below; radial outer edges merge in an angular manner with the radial ends as shown in Diagram 1 above; radially outer edges merge with a radius with radial ends as shown in Diagram 1 above; radially inner edges merge with a radius with radially outer edges as shown in figure 4, which shows the intersection of element 22 and element 16 as a wide shaded line indicating a gradual transition.

Allowable Subject Matter

4. Claim 48 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments with respect to claims 38-42 and 48-52 have been considered but are moot in view of the new ground(s) of rejection. Also, applicant did not respond to the rejection of claims 43-47.
